SUMMARY

I'm an Information Systems graduate with a focus on front-end development and improving how users interact with digital tools. I worked on the UI and development of a Management Information System for Calayan Educational Foundation Inc., where I helped simplify student activity proposals, certificate requests, and added features for tracking and reports. I have experience with GitHub, React, Tailwind, Bootstrap, PHP, and SQL. I'm looking to build more practical experience with modern front-end frameworks and contribute to real-world projects.

EDUCATION
